Joshua Capito

Software Developer | Experienced in React, TypeScript |
Videographer & Editor | Passion for creating digital experiences |
Interests in Agentic AI
Cambridge, England, United Kingdom

Summary

Having made the courageous switch from Product Design to
Software Development, I bring a fresh perspective to my work. I have
a strong eye for detail and a passion for creativity, which fuels my
curiosity. I love working at the intersection of design, development,
and the latest technology, focusing on creating digital experiences
that engage users and elevate their satisfaction.

Creative Enthusiast:
Creativity is the driving force behind everything I do, continuously
inspiring me to explore fresh avenues for expressing my imaginative
flair. From expressing a narrative through music, cinematography
and photography to developing visually captivating websites that
leave a great impression.

I'm always eager to embark on new creative adventures. It's the
thrill of turning ideas into reality and the satisfaction of knowing that
I've made a meaningful impact that fuels my relentless pursuit of
innovation.

Passion for UX/UI Design and Web Development:
I specialise in creating captivating user experiences. My experiences
transitions into front-end development, where I not only bring designs
to life but also infuse them with my love for creating digital art. By
harmonising form and function, I blend the worlds of visual artistry
and problem-solving through code, resulting in immersive user
interactions.

Experience

Risidio
Software Developer
January 2025 - April 2025 (4 months)

London Area, United Kingdom

Contributed to establishing the system architecture and built features for an MVP for FilmFusion, a decentralised application (dApp) for independent creators and filmmakers to take ownership of their work, and enforce better transparency through Web3 technology, by developing Smart Contracts, and helped to develop the frontend of FilmFusion web application.

dcloud9 ltd.
Junior DevOps Engineer
November 2022 - May 2024 (1 year 7 months)
London, England, United Kingdom

I collaborated on the MAGY project for IAVI, ensuring alignment with client requirements to deliver robust backend solutions. My responsibilities included developing backend APIs using Python and GraphQL, optimising user data management with AWS Lambda, and integrating queries with AppSync for seamless interaction with DynamoDB. I also automated processes using Terraform, streamlining communication between the AWS console and Service Workbench to improve infrastructure management and deployment speed. Additionally, I actively participated in daily stand-ups and sprint updates within an Agile environment, fostering team collaboration and honing problem-solving skills.

PolicyCON®
Frontend Developer Intern
September 2023 - December 2023 (4 months)
United Kingdom

Worked alongside the development team to contribute to building features for PolicyCON's revamped website.

NTU Design Industries
Lead Web Developer
September 2021 - May 2022 (9 months)
Nottingham, England, United Kingdom

Led a team of three to ensure timely website deployment by assigning tasks, resolving challenges, and achieving weekly goals. Collaborated with the Branding team to align designs with annual themes, creating cohesive and engaging layouts that improved user experience. Mentored team members in debugging, data handling, and UX/UI principles, boosting efficiency and meeting targets. Successfully managed the project alongside academic

responsibilities, deploying the website on time. Optimised content for SEO, increasing website traffic by 15% year over year.

Unitemps
Web Designer
August 2021 - September 2021 (2 months)
Nottingham, England, United Kingdom

Worked as a Web Designer and Developer with NTU Masters Product Design students to create a virtual platform showcasing their work and profiles. Using Squarespace, I designed a professional and user-friendly website that effectively displayed their projects and achievements. I collaborated closely with the students to understand their creative goals, tailoring the platform to highlight their work while maintaining a cohesive and engaging design. The result was a polished showcase that helped them share their portfolios with prospective employers and collaborators.

NTU Design Industries
User Interface Designer
March 2021 - May 2021 (3 months)
Nottingham, England, United Kingdom

Enrolled as a team assistant/assistant web designer for the Nottingham Trent University Design Industries (NTUDI) cohort '21 as part of Nottingham Trent University's unique remote programme, Professional Industry Projects (PIP).

I was involved in weekly standup meetings, discussing design ideas and iterations, and developing through Wix for the NTUDI 2021 website. Other tasks included engaging with students to curate a professional profile on the website.

Education

edX
Trilogy Skills Bootcamp in Front-End Web Development, Computer Science · (November 2022 - March 2023)

Nottingham Trent University
BSc (Hons), Product Design · (September 2018 - July 2022)
